PROJECTS

AI Resume Builder [GitHub]
Java, Spring Boot, Spring AI, React, Gemini Api
− Developed an AI-powered resume builder that generates professional resumes from user descriptions using Gemini LLM Api.
− Utilized Java, Spring Boot, Maven, RESTful APIs, and Gemini for backend integration, with React for the frontend interface.
− Engineered robust JSON parsing, prompt templating, and error handling to ensure reliable, customizable, and scalable resume generation.

AI Email Writer [GitHub]
Java, Spring Boot, Spring AI, Gemini Api
− Developed a Spring Boot backend service that generates context-aware, professional email replies using Google Gemini AI, with precise prompt engineering for concise outputs.
− Designed logic to ensure replies contain only the email body—no subject lines, headers, or sections—while matching user-specified tone and preserving sender intent.
− Built a Chrome extension for direct Gmail integration, enabling users to draft AI-powered email responses from their inbox instantly.

Banking Management System [GitHub]
Java, Spring Boot, Spring Security, JWT, MySQL
− Developed a secure, multi-role banking system supporting Customer, Employee, and Manager authentication and authorization using Spring Security and JWT
− Implemented RESTful APIs for user registration, account management, loan processing, transaction logs, and branch operations with Java, Spring Boot, and MySQL.
− Designed a unified authentication mechanism for multiple user types via a custom `UserDetailsService` and stateless JWT-based security.
